Scheduling & Home Owners Responsibility

Scheduling:

Every effort is made to complete your job in a timely manner: our average lead-time for a project is 4-6 weeks. Weather conditions affect every job in different ways. Therefore, last minute schedule changes and delays are sometimes unavoidable.

Project scheduling starts with a down payment. At this time, Plantperfect will know the approximate lead-time and add your name to the list of installations. If you need to have work done prior then the scheduled date, every effort will be made to accommodate your needs.

If you would like to be home, or make special arrangements due to the installation, please let Plantperfect know so we can contact you if any last minute changes are necessary.

Home Owner Responsibilities:

Plantperfect will notify ND One-Call prior to installation to have public utilities located. These are the main utilities to the home. It is the homeowners responsibility to locate and mark any underground lines, wires, services or systems on their property that are not marked by ND One-Call.

There are a few things you can do to help ensure high quality work:

- Mow the lawn prior to installation.
- Remove any items that you want to save (rocks, statues, driftwood, plants, etc.)
- If you have pets, please provide a clean area for our employees to work.
- Please inform Plantperfect of any other work being done by others, including topsoil, seeding, sod, construction, etc. This will insure proper accommodations are made.
